Cassette to MP3 Converter

MYPIN Cassette Tape Converter

This device will let you transfer cassette tapes to a USB stick in MP3 format.

It can also be used to listen to cassette tapes out loud or with headphones.

Video to Digital Converter

Video2Digital Converter 3.0

This device will let you convert video and audio sources to digital format.

The source data can be from VHS, Hi8, and camcorder players, retro gaming systems, cassette players, turntables, and more. It will take in any composite video (yellow) or stereo audio (red and white) inputs, and record to a USB Thumbdrive or a MicroSD Card.

Film Digitizer

Kodak Reels Film Digitizer

This device will let you convert film reels to a digital format.

The source footage can be from either 8mm film reels or Super 8mm film reels. The digitized footage records onto an SD Card. This device can also be used to view footage on film.

Photo Scanner

Epson FastFoto FF-680W Wireless High-Speed Photo Scanning System

This device will let you view and scan printed photos to a digital format. It is wireless and very speedy.

The photos you scan can be up to seven inches (7") wide, and of any length.

Digital Film & Slide Scanner

Kodak Slide N Scan Digital Film Scanner

This scanner allows you to view and digitize photo negatives that are in a slide format.

It allows you to view negatives of sizes 135 (3:2 ratio), 110 (4:3), and 126 (1:1 ratio), as well as 50mm Slides. You can view the images before saving, as well as edit aspects of the image like brightness, red-eye, and contrast.

CD/DVD Drive

This device will let you record data onto or read data from any CDs or DVDs.

It connects to a computer using a USB cable, and works as though it were built into the computer. Note that this device will not play Blu-ray or 4K Blu-ray discs, only CDs and DVDs.

Microfilm Reader

Canon Microfilm Scanner 400

This device will let you view and make copies of microfilm files. This includes the Library's collection of the Exeter News-Letter.
